

YOOBEES STUDENT PLATFORM GUIDE

1) What is YooBees?

YooBees is your student portal for attendance, profile management, and class support resources.

Use it to:

- ? Mark attendance during active class checkpoints.
 - ? Track your attendance history.
 - ? Keep your student profile updated.
 - ? Access MBI802 resources (if your intake/subjects include MBI802).
-

2) First-time setup

Step 1: Sign in

- ? Open the YooBees login page.
- ? Sign in with your student account.

Step 2: Select your intake

On first login, the platform prompts you to choose your intake:

- ? ****2511**** ? subjects include ****MBI804****
- ? ****2604**** ? subjects include ****MBI800**** and ****MBI802****

Step 3: Upload your profile photo

You will be prompted to upload a profile photo. This helps lecturers and classmates identify you.

3) Main student menu

After login, use the sidebar to open:

- ? ****Dashboard****

- ? ****My Profile****
 - ? ****Attendance****
 - ? ****My History****
 - ? ****MBI802 Resources**** (only shown when eligible)
-

4) Dashboard

The Dashboard gives a quick overview of your student experience, including profile-related highlights and batchmate information.

Use it to:

- ? Confirm your account/profile is recognized.
 - ? View student community highlights.
-

5) My Profile (important)

Keep your profile complete and accurate.

Recommended fields to complete:

- ? Full name
- ? Student ID
- ? Campus and section
- ? Intake
- ? Course
- ? Home country and hometown pin on map
- ? Work background and educational background
- ? Special learning/support needs

Why this matters:

- ? Attendance submission can require profile details (especially campus and section).
 - ? Accurate profile data helps lecturers support you better.
-

6) Attendance

The Attendance page is where you:

- ? Submit attendance during active checkpoints.
- ? Check current attendance windows.
- ? Submit absence notices when needed.

Tips:

- ? Submit as early as possible during active windows.
- ? Double-check your profile first if submission is blocked.

7) Quick Attend link ('/attend/<code>')

Sometimes lecturers share a quick attendance code/link.

How to use it:

1. Open the shared attendance link.
2. Sign in as a ****student**** if prompted.
3. Confirm the session/checkpoint details.
4. Submit attendance before the countdown expires.

Important behavior:

- ? A checkpoint only works while active and not expired.
- ? Duplicate submissions are blocked.
- ? If your campus/section is missing, complete ****My Profile**** first.

8) My History

Use ****My History**** to review:

- ? Past attendance submissions
- ? Checkpoint-level records
- ? Submitted absence notices and their status

This is useful when you need proof of submission.

9) MBI802 Resources

If you are enrolled in **MBI802**, this page provides extra learning resources (such as setup/tutorial links shared by lecturers).

If you do not see this page, your current subject list likely does not include MBI802.

10) Common issues and fixes

?I can't submit attendance.?

? Check that the checkpoint is still active.

? Check your internet connection.

? Open **My Profile** and ensure campus + section are filled.

?I can't see MBI802 resources.?

? Verify your intake/subjects in your student profile.

?I submitted, but I'm unsure it worked.?

? Check **My History** for your latest submission.

11) Good student practices

? Keep your profile updated each term.

? Submit attendance immediately when a checkpoint opens.

? Save screenshots if you encounter errors.

? Review **My History** regularly.

12) Quick checklist before class

- ? I can sign in.
- ? My profile includes campus and section.
- ? I know where Attendance and Quick Attend are.
- ? I can open My History to verify submissions.
